

## Chart of Prerequisites for Freshman Mathematics Courses University of Louisville 2010

1. Completion of the course(s) at the tail of an arrow meets the prerequisite(s) for admission into the course at the head of that arrow. Each arrow leading to a course shows a path for meeting the prerequisites for that course.
2. Lack of an arrow from a lower numbered course to a higher numbered course means completion of the former does NOT lead to admission into the latter. For example, *completion of Math 105 does NOT give admission to Math 111.*
3. Courses in the dark box meet the UofL Mathematics General Education requirement.
