

Course Information Sheet

Mathematics 208, Section 006, Fall 2003, Oldfather Hall 204
12:30 p.m.–1:20 p.m., M-W-R-F

Instructor: Dr. Jon-Lark Kim. Office: 936 Oldfather Hall. Phone: 472-7253. E-mail: jlkim@math.unl.edu
<http://www.math.unl.edu/~jlkim>

Office Hours: M-W-F 10:30–11:30.

Text: *Calculus*, Smith and Minton, *Second Ed.* McGraw-Hill, 2002.

Calculators: A graphing calculator is required for this course. The Texas Instruments TI-85 or TI-86 is recommended.

- *Always bring your calculator to class!* You will need it for practical work in class.

Homework and Reading: Beside each lecture date on the syllabus, you will find a list of sections from the text to be discussed in lecture and problems from the sections. Please read the text prior to class. You are to work ALL these problems (unless I say otherwise during lecture) before the next lecture. You learn this material by doing homework. So I strongly recommend that you **hand in homework each Monday**.

Quizzes: There will be a (10-15min) quiz at the end of every Friday class. It will cover previous materials and homework problems. I'll announce which sections will be on the quiz before Friday. No quizzes on exam weeks!

Exams: There will be three midterm exams and one final exam.

Midterm Exams: The midterms will be given on Fri., Sept. 25; Thurs., Oct. 30; and Fri., Dec. 5. I expect you to arrange your schedule to accommodate the exam dates or to choose another section of Math 208.

Final Exam: The final will be two hours in length and it will be given on Tuesday, Dec 16, from 6–8 p.m. The location of the final will be announced during the last week of class.

Grading Policy: The following table shows how points will be awarded over the course:

	Number	Pts.	Total
Midterm Exams	3	100	300
Quizzes	highest 10	10	100
Homework	highest 10	5	50
Final Exam	1	200	200
<hr/> TOTAL			<hr/> 650

At the end of the course, your final grade will be based on the number of points you receive. While I may choose to adjust the course grading scale, the following table gives the *minimum grades* as a function of point totals:

Total Percentage (%)	93	90	87	83	80	77	73	70	67	63	60	57	below 57
Minimum Grade	A+	A	A–	B+	B	B–	C+	C	C–	D+	D	D–	F
